

# *Charlie and the Chocolate Factory – “Vidiots”*

MTI is excited to make the electronic music supplement for “Vidiots” available for your production!

You will find the following files in this digital folder:

1. “Vidiots” Click Track
2. “Vidiots” Kick Drum and Bass Only Track
3. “Vidiots” Full Mix

Depending on your production’s needs and technological capabilities, please choose the option that will work best for you.

## Option 1 – Click Track with Kick Drum and Bass Only Track

The Click Track and the “Kick Drum and Bass Only” track should be used in tandem, with the click track keeping the live music in alignment with the digital track.

The “Kick Drum and Bass Only” track is silent for the first 40 seconds, with the drum and bass coming in at 00:41. This aligns with measure 21 of score. The click track begins with a 4 beat/1 measure pick-up prior to measure 1 and will keep everyone together.

*(Note: the time stamps for the Kick Drum and Bass Only Track as noted in the Conductor/Keyboard 3 score are **4 seconds off**.)*

## Option 2 – Full Mix

You are welcome to have your live musicians play alongside the Full Mix track and treat the track as a digital “sweetener” to enhance the techno sound. You are also welcome to use the track as a substitute for your production’s live music and have your live musicians treat “Vidiots” as a tacet song. Whatever is best for you!

Please note that this is the extent of what MTI can provide for “Vidiots.” MTI is unable to create a bespoke track to an individual production’s specifications.
